

JOHN BOLAÑOS

SOFTWARE ENGINEER

PROFESSIONAL SUMMARY

Systems Engineer specialized in software development with over six years of experience in leading and managing innovative projects. I bring a broad set of skills and knowledge in multiple programming languages, covering both web and mobile application development (frontend) as well as the implementation of robust server-side solutions (backend). A self-taught professional and passionate about new technologies, I am constantly seeking to stay at the forefront of innovation to deliver value and excellence in every project.
